DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Douglas Hanscom on 2/23/2010.

- In claim 44, at the end of line 8, please insert the recitation --**providing a pump in said fluid flow path**--.
- In claim 44, at the end of line 9, please insert the recitation --**providing said temperature regulating fluid as a liquid**--.
- In claim 64, after the word "path" in line 8, please insert the recitation --, **said temperature regulating fluid being a liquid**--.
- In claim 64, at the end of line 16, please insert the limitation --**a pump in said fluid flow path, said first temperature sensor being located between said fluid feed-in point and said pump**--.
- Please cancel claim 82.

Allowable Subject Matter

2. Claims 44, 48, 49, 52, 54-58, 61-64, 66, 68-72, 75, 79, 83 and 85 allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record teach all the limitations of claims 44 and 64 except for "controlling the temperature of a printing press component with a temperature regulating fluid being a liquid by pumping fluid through the component, and controlling the temperature of the component using a control device having inner and outer cascaded control loops and supplying corrected command values from the inner and outer control loops to an actuating member." The prior art of record (Meyer, US 5,931,376) discloses a device for controlling the temperature of a room having a textile machine using feedback control, but not controlling the temperature of a printing press component with a temperature regulating fluid being a liquid by pumping fluid through the component, and controlling the temperature of the component using a control device having inner and outer cascaded control loops and supplying corrected command values from the inner and outer control loops to an actuating member. Although it is well known to provide a device for controlling the temperature of a room having a textile machine using feedback control, there is no teaching in the prior art of record that would, reasonably and absent impermissible hindsight, motivate one having ordinary skill in the art to modify the teachings of the prior art to incorporate controlling the temperature of a printing press component with a temperature regulating fluid being a liquid by pumping fluid through the component, and controlling the temperature of the component using a control device having inner and outer cascaded control loops and supplying corrected command values from the inner and outer control loops to an

actuating member. Thus, for at least the foregoing reasons, the prior art of record neither anticipates or rendered obvious the present invention as set forth in claims 44 and 64.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
